

GUERNSEY-MUSKINGUM ELECTRIC COOPERATIVE CURRENTLY SPEAKING

MESSAGE FROM THE GENERAL MANAGER

DON'T WAIT. BE PREPARED BEFORE THE STORM.

Brian Hill
GENERAL MANAGER/CEO

It's your worst-case scenario: A major storm was predicted, and this time, the predictions were right. Many power lines are down, and your electricity may be out for several days. You're low on everything — food, pet supplies, toilet paper, batteries, diapers, and your medication.

Imagine how you would feel in this situation. While you can't predict which weather forecast will come true, you can plan ahead so that when a severe weather event strikes, you have the tools and resources to effectively weather the storm. The U.S. Department of Homeland Security offers several resources to help you prepare for major weather events and natural disasters. Visit www.ready.gov/make-a-plan.

Preparedness actions and items

- Stock your pantry with a three-day supply of nonperishable food (such as canned goods, energy bars, peanut butter, powdered milk, instant coffee, and water) and other essentials (like diapers and toiletries).
- Confirm that you have adequate sanitation and hygiene supplies, including towelettes, soap, and hand sanitizer.
- Ensure your first aid kit is stocked with pain relievers, bandages, and other medical essentials, and make sure your prescriptions are current.
- Set aside basic household items you will need, including flashlights, batteries, a manual can opener, and a portable, battery-powered radio or TV.
- Organize emergency supplies so they are together in an easily accessible location.

With advance warning

If a severe storm with high winds and sustained rain is expected, you may need to take extra steps to safeguard your home. Shutter windows and securely close exterior doors. Fully charge all cellphones, laptops, and devices so you have maximum power in the event of a power

outage. If you plan to use a small generator, make sure it's rated to handle the amount of power you will need, and always review the manufacturer's instructions to operate it safely.

During a prolonged outage

In the event of an outage, turn off appliances, TVs, computers, and other sensitive electronics. This will help avoid damage from a power surge and will also help prevent overloading the circuits during power restoration. That said, do leave one light on so you will know when power is restored. If using a small household generator, consider using LED holiday lights to illuminate a living area. A strand of 100 white lights draws little energy yet produces considerable light. Solar lights also work, if they can receive some sunlight during the day for charging.

During thunderstorms, the American Red Cross recommends avoiding electrical equipment and land-based telephones. Use battery-powered TVs and radios instead. Keep away from windows. Listen to local news or NOAA Weather Radio for emergency updates or check Guernsey-Muskingum Electric Cooperative's app or website for restoration updates.

After the storm, avoid downed power lines and walking through flooded areas where power lines could be submerged. Allow ample room for utility crews to safely perform their jobs — including on your property.

Power in planning

Advance planning for severe storms or other emergencies can reduce stress and anxiety caused by the weather event and can lessen the impact of the storm's effects. Sign up for NOAA emergency alerts and warnings and install Guernsey-Muskingum Electric Cooperative's app to your phone to stay abreast of restoration efforts and other important co-op news and information. Act today, because there is power in planning.

GUERNSEY-MUSKINGUM ELECTRIC COOPERATIVE CURRENTLY SPEAKING

Ray Crock

Are you considering rooftop solar panels?

Solar energy is a hot topic in the electric cooperative world, and we want to ensure our members have the information they need to make an informed decision regarding this type of investment. Rooftop solar panels are decreasing in cost, and more companies are offering solar panel installation in our member communities. As attractive and popular as rooftop solar may appear, we want our members to fully understand the true costs, the operational reality of this form of energy, and actual energy savings.

We're here to help

To determine whether rooftop solar is right for their particular situation, homeowners must undertake their own due diligence. Guernsey-Muskingum Electric Cooperative can offer a candid assessment of your specific situation. After all, we strive to find new ways to help you use energy more efficiently.

Is rooftop solar right for you?

To help determine whether rooftop solar is right for you, Guernsey-Muskingum's energy advisor will look at the:

- Overall energy efficiency of the home/building
- Age and pitch of the roof
- Orientation of the sun in relation to the home/building
- Tree coverage near the home/building
- Weather patterns for the region

Unlike a solar company that has one objective — to sell their products and services — we can look at the total energy picture to help you determine the best options for your home. While rooftop solar certainly works for many people, it's not the answer for all. When helping

co-op members determine whether rooftop solar is right for them, a co-op energy advisor will also discuss the many financial considerations:

- Is there a large, up-front payment required or are fees spread out over time?
- Will the homeowner own the panels or will they be leased?
- Are there any hidden costs, for example, does the roof need to be replaced before installing the panels?
- Are there ongoing maintenance fees?
- Are there rebates or other financial incentives available?
- Is the estimated energy savings worth the investment?
- Is it more cost effective to invest in other energy saving measures?

Most importantly, our energy advisor can provide perspective on the total energy puzzle. They can help your family determine whether rooftop solar is the best choice given your current energy consumption, the home "envelope," age and efficiency of the HVAC system, and home site.

What about Community Solar?

We recognize not all cooperative members can install a system on their roof, but that doesn't mean solar power isn't an option. The Energy Cooperative offers a community solar program where you can lease a solar panel located in New Concord, Ohio. With our community solar, the cooperative handles all of the logistical details (including site assessment, selecting and installing the equipment, interconnection and permitting details, and maintaining the system after installation). Contact our member service team to learn more about community solar.

Guernsey-Muskingum Electric Cooperative recognizes that many of our members have an interest in green energy sources. We are ready to help you determine the best options for your particular situation.

Learn More

Ohio's electric cooperatives take a balanced approach to renewable energy. To learn more about the renewable energy sources available to our electric generation provider, Buckeye Power, visit ohioec.org/buckeye-power/renewables.

Official notice of medical certification

Medical certification forms are available upon request at the Guernsey-Muskingum Electric Cooperative, Inc. office for those persons who must certify that disconnection of electric service would make the operation of necessary medical equipment impossible or impractical or that such discontinuation of electric service would otherwise be dangerous to the health and welfare of persons residing in the household.

In all cases where discontinuation of service would be especially dangerous to the life and welfare of the occupants within a household, the consumer should contact the cooperative and request a Medical Certification form. This form must be completed and certified by a licensed physician or local board of health and filed with the cooperative.

GUERNSEY-MUSKINGUM ELECTRIC COOPERATIVE CURRENTLY SPEAKING

Cardinal Plant tour

If you are interested in touring a power plant that generates electricity, please call Guernsey-Muskingum's member services department today at 800-521-9879.

You, a cooperative member, are one of the owners of the Cardinal Power Plant in Brilliant, Ohio, and this is a chance to see it in operation.

A bus ride, tour, and lunch will be provided for members on Wednesday, Oct. 2.

Seats will be reserved for cooperative members who have not taken the tour in the past. Please call, as seats are limited, and will be filled on a first-call/first-served basis.

Please be aware that in the event that there is a "high" or orange security warning issued by the U.S. Department of Homeland Security, the tour may be canceled. If you have any questions, please call your cooperative.

*Please, be our guests!
But don't delay!*

10th ANNUAL FARM SCIENCE REVIEW BUS TRIP

Wednesday, Sept. 18

Yes, I/we would like to join our co-op and ride in a
Muskingum Coach Tour Bus to the Farm Science Review at London.

Seats will remain at \$25 each this year.

Name _____

Phone _____

Address _____

Enclosed is a check for \$_____. Please make check payable to GMEC.

DON'T WORRY ABOUT THE TRAFFIC — LEAVE THE DRIVING TO US!

Your ticket covers the bus trip to and from the review and your ticket to the Farm Science Review.

Bus departs Cambridge at 6 a.m., and Zanesville at 6:30 a.m.

I WILL BOARD THE BUS AT _____ **CAMBRIDGE** _____ **ZANESVILLE**

Mail or return to:

Guernsey-Muskingum Electric Cooperative, Inc. • 17 S. Liberty St., New Concord, OH 43762

For more information, call member services at 800-521-9879.

Would you please help your cooperative find former members?

Guernsey-Muskingum Electric Cooperative would like your help in locating the following former members (or their heirs) who received service from the cooperative in prior years.

Capital credit refund checks were mailed to former members listed in this Ohio Cooperative Living issue. These checks have not yet cleared the bank or have been returned to Guernsey-Muskingum as “undeliverable.”

If you have information on any of the names in the capital credit refund listing, please call the cooperative office at either of the numbers listed below and provide the information to the member accounting department.

The cooperative is aware that many of the former members listed are deceased. We are looking for surviving family members who are eligible to receive the capital credit check. Thank you for your help in locating our former members.

OFFICIAL NOTICE

Certification of Active Duty Deployment

Guernsey-Muskingum Electric Cooperative, Inc.

The cooperative will not disconnect electric service to the residential premises of any residential member who is deployed on active duty for nonpayment for electricity provided to the residential premises.

Upon return of the residential member from active duty, the cooperative will offer the residential member a period equal to at least the period of deployment on active duty to pay any arrearages incurred during the period of deployment. If the period the cooperative offers the residential member for repayment presents a hardship, the member may request a longer period to repay the arrearages. No late payment fees or interest will be charged to the residential member during the period of deployment or the repayment period.

Active duty means active duty pursuant to an executive order of the president of the United States, an act of the Congress of the United States, or section 5919.29 or 5923.21 of the Ohio Revised Code.

The residential member must resume the timely payment of all charges for electric service provided by the cooperative after the return from active duty deployment.

In order to avoid disconnection of electric service for nonpayment for electric service during a period of active duty deployment, a completed Certification of Active Duty Deployment form must be submitted to the cooperative. Certification of Active Duty Deployment forms are available from the cooperative upon request.

HARVEST SAFETY TIPS FOR FARMWORKERS

- **Maintain a 10-foot clearance** around all utility equipment in all directions.
- **Use a spotter and deployed flags** to maintain safe distances from power lines and other equipment when doing field work.
- **If your equipment makes contact with an energized or downed power line, contact us immediately** by phone and remain inside the vehicle until the power line is de-energized. In case of smoke or fire, exit the cab by making a solid jump out of the cab, without touching it at the same time, and hop away to safety.
- **Consider equipment and cargo extensions of your vehicle.** Lumber, hay, tree limbs, irrigation pipe, and even bulk materials can conduct electricity, so keep them out of contact with electrical equipment.

Source: Safe Electricity

CO-OP NEWS

Geothermal heating and cooling system — \$300 rebate

We have a \$300 rebate to help pay for the most efficient underground heating, cooling, and hot water system available today. To be eligible, the geothermal unit must be ENERGY STAR-rated and have a radio-controlled switch installed on the unit and on the electric water heater of at least 40-gallon capacity. Over 280 of our members are using geothermal.

Dual Fuel — \$300 rebate

If you install a new add-on electric heat pump with a fossil-fuel backup and have an electric water heater of at least 40-gallon capacity, you are eligible for a \$300 rebate. Radio-controlled switches must be installed on both the heat pump and water heater. Please call your cooperative for details. Over 890 members are using Dual Fuel.

Cool Returns — \$100 rebate

Are you having central air conditioning installed or a new electric heat pump with electric resistance heat backup? Allow your cooperative to install a radio-controlled switch and receive a \$100 rebate check. Over 170 members are using Cool Returns.

ENERGY STAR refrigerator/freezer rebate

Did you buy a new ENERGY STAR refrigerator or freezer? We may have a \$100 rebate for you. Call member services for details.

Water heater with a hole

The 4-inch hole in the side of our tank is great for cleaning out sediment. This rebated tank is available for free delivery. We also have \$50 or \$100 checks to send you if you purchase a tank somewhere else. Give us a call for details.

Water heater installation available

If you purchase your water heater from GMEC, our member services technician, Tim Fisher, may be able to install your water heater for an additional charge. Give us a call for details.

Radio-controlled switch

What a deal! If you don't already have a radio-controlled switch (RCS) for your electric water heater of at least 40-gallon capacity, please call, and Tim Fisher will install one at no charge. Over 5,600 GMEC members have an RCS on their water heaters. The switch entitles you to a discount and free maintenance (except cleaning), including parts and labor, on your electric water heater. Some exclusions apply; call us for details.

GenerLink

We want you to use your portable generator safely. Call the member services department at GMEC and ask about GenerLink. GenerLink eliminates the use of extension cords and other connections that can be dangerous to members and linemen. Over 200 members currently have a GenerLink installed at their homes.

Meter reading

You can enter your meter readings online at our website, www.gmenergy.com. You can also mail your readings or call us 24 hours a day with meter readings.

Co-op Connections card

The Co-op Connections card is free to all GMEC members, and one card can be used by the entire family. The card can be used to receive discounts nationwide on lodging, entertainment, dining, and more. Visit www.gmenergy.com and click on the link to explore the possible discounts available to you.

GUERNSEY-MUSKINGUM ELECTRIC COOPERATIVE CURRENTLY SPEAKING

The Guernsey-Muskingum Electric Cooperative office will be closed on Monday, Sept. 2, so that our employees and their families can celebrate Labor Day.

For outage assistance, call 800-521-9879.

We wish you a safe and fun Labor Day weekend!

Energy Efficiency Tip of the Month

Cookware tip: Copper-bottomed pans heat faster on the stove. In the oven, ceramic and glass dishes are better than metal. With ceramic and glass dishes, you can turn the oven down about 25 degrees, and your meal will cook just as quickly.

Source: energy.gov

Is your name and account number here?

If it is, call the cooperative's office and receive a FREE home change-out to LED lightbulbs (limit six bulbs). Thanks for reading the local pages of *Ohio Cooperative Living* magazine.
